

## How to get started with the Amazon Module

The Amazon Module for ReadyShipper delivers the latest in integration technology from Amazon.™ This Module is available for use only with Pro Merchant or paid Seller Central accounts and is PC and Mac compatible.

The new Amazon Module brings advanced multi-carrier shipping to your desktop. Features include batch import, view, update and more. This module reads the order status from your Amazon account so that only new orders are imported into ReadyShipper. You are protected from importing the same order twice. After shipping, ReadyShipper updates your Amazon account with the shipping method (carrier), status, tracking number and date.

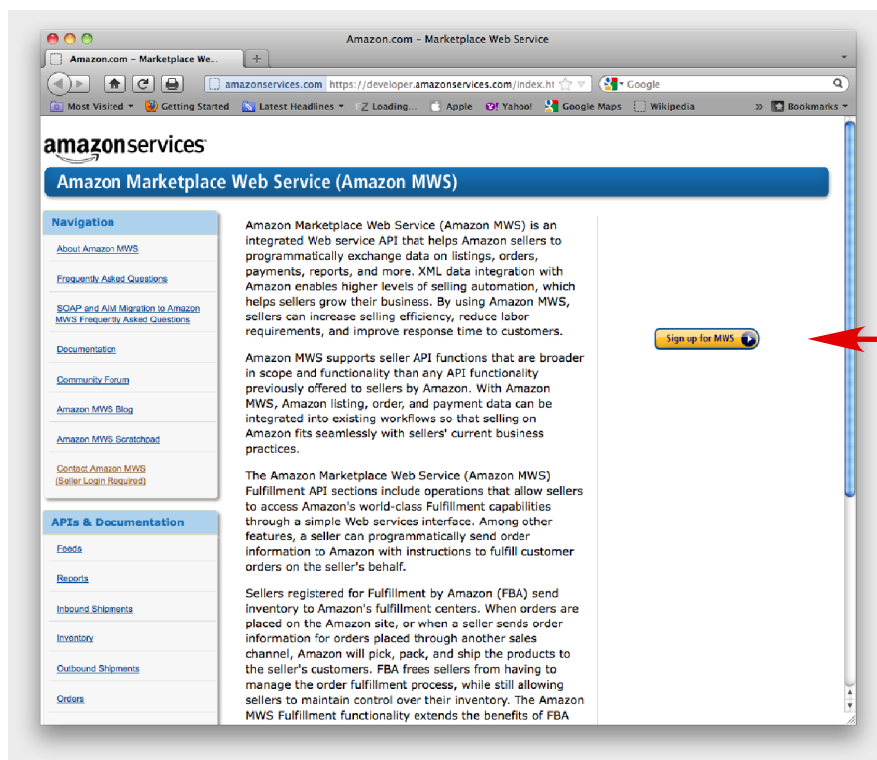

The shipping status is always updated to keep your Merchant account performance rating at the highest level.

The new Amazon Module for ReadyShipper requires the following information:

- Marketplace ID
- Merchant ID

Getting started is free and it takes only a few minutes.

**Start by going to: <http://developer.amazonservices.com>**

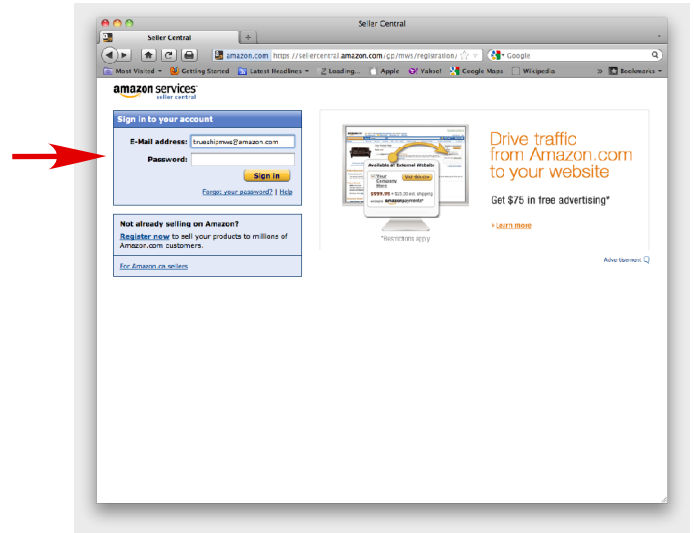

Click here to get started.  
It's free and takes only a few minutes.

# Amazon Module Activation

This is a short process. There are only 3 steps.

Enter the email and password used with your Amazon Merchant account. You do not need to sign-up for a new account.

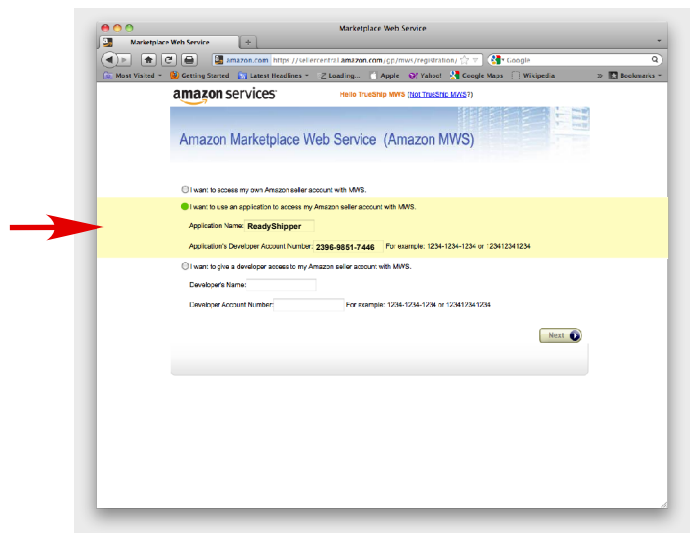

## To complete this screen you must:

1) Type the application name (ReadyShipper) into the text box. This name is for your own records and does not need to be exact.

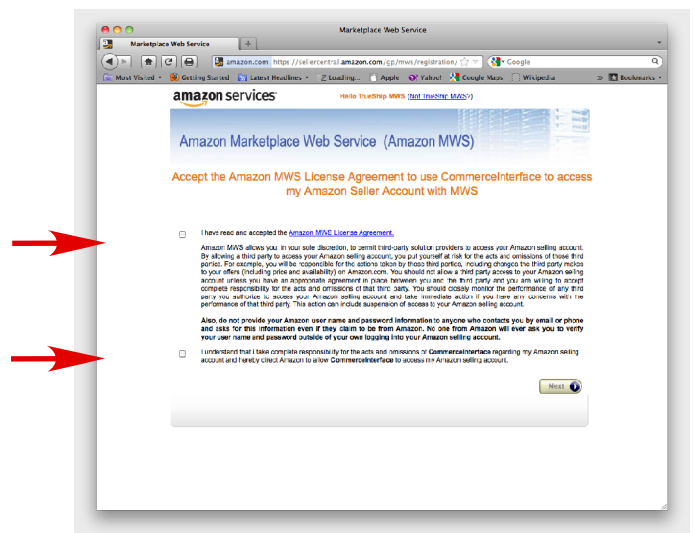

2) Type the application's developer account identifier (2396-9851-7446) into the next text box. This must be exact.

Click Next.

Accept the MWS License Agreement in two places.

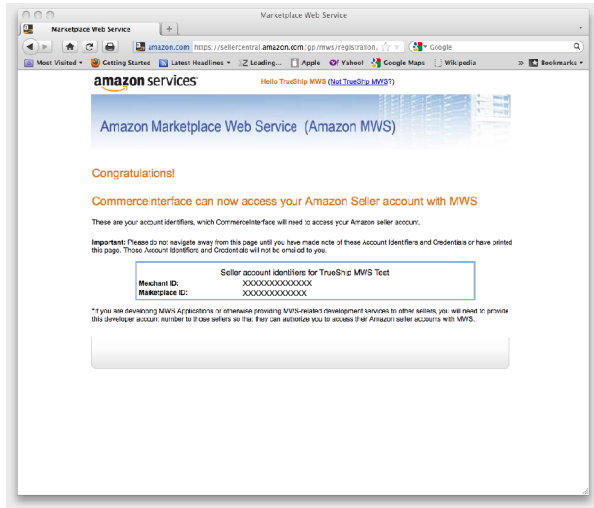

Click Next.

The final step delivers your AWS Merchant and Marketplace IDs

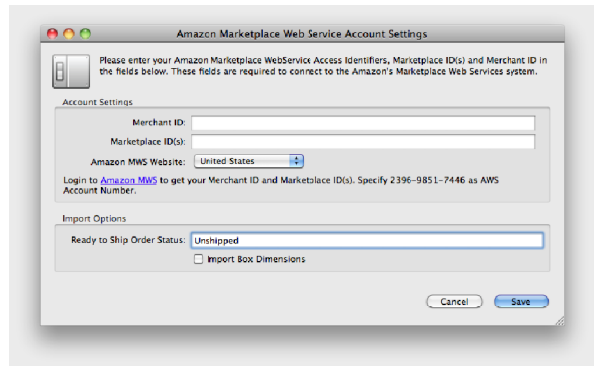

Shown below is a sample screen of what you can expect to see in the final step of activation. It is recommended that you cut and paste these keys directly into the appropriate fields in ReadyShipper's Amazon Module.

Note that TrueShip does not have access to this information. In the event that these keys are lost TrueShip is unable to recover them. You will need to apply for a new set of keys.

**Merchant ID**  
Save this ID for use in the Amazon Module for ReadyShipper. (shown below)

**Marketplace ID**  
Save this Key for use in the Amazon Module for ReadyShipper. (shown below)

**Amazon Module Settings Screen**

The new Amazon Module from TrueShip is for use only with ReadyShipper 6.5.2 and later.

The screen shown to the left is located in ReadyShipper's **Modules** menu. Select **Amazon** and then choose **Settings**.

Cut and paste your Merchant and Marketplace IDs and click Save.

For additional instructions on how to use ReadyShipper, including demonstrational videos, PDF's and sample import files look to <http://www.trueship.com/TrueShip-Demo.html>.
